Managing Director

Chemservice Americas LLC

150 North Michigan Avenue, 35th Floor

Chicago, IL 60601

United States

americas@chemservice-group.com

+1 312 585 8334

Chemservice is a leading global consultancy to the chemical industry and, as an independent service provider, we support our clients in the review, implementation and observation of international chemical regulations. We use our scientific, technical and strategic know-how to overcome regulatory barriers globally, giving our clients a competitive edge. Chemical legislation is comprehensive to ensure product safety and relevant chemical hazard communications, producer liability and consumer and environmental protection to regulate the marketing of chemical substances. In addition to inventory notifications, we also carry out registrations of biocides and food contact materials. Through our offices and regional partners, we support you in complying with international chemical regulations such as REACH, K-REACH, UK REACH and KKDIIK. Our various legal entities offer regulatory consultancy for the Swiss, South American and US markets. We provide strategic and technical support for REACH and GHS/CLP. The technical support includes, for example, registration cost evaluation and -strategy leading to the dossier preparation and registration, data gap analysis, testing strategy proposals, placing/monitoring of studies, compilation of chemical safety reports, exposure, hazard and risk assessments, PBT/vPvB evaluation, C&L notification, safety data sheet and label creation, as well as support on environmental health and safety (EH&S) issues. In addition, we provide REACH authorisation and restriction services (including RMOA and SEA), advocacy and product stewardship consulting.

Donald Ewert Toxicologist & IH

Operations Manager

Reddwall Solutions

PO Box 381

Monroeville, PA 15146

United States

dewert@reddwallsolutions.com

4125255998

Our service group provides SDS Hazard Inversion services in which we utilize extremely sensitive scientific materials characterization methods to quantify the ingredient concentrations remaining in finished mixtures. Based on this data, we are often able to invert a hazardous SDS classification into a nonhazardous classification.

We also provide a full portfolio of TSCA support services including PMN, LVE, Bona Fide and Importer of Record.
