

Presentation Title: Data available under REACH and Global Impact of those Data

Lynn L. Bergeson, Manager Partner  
Bergeson and Campbell, P.C.

Owner of Bergeson & Campbell, P.C. (B&C®), Ms. Bergeson counsels clients on issues pertaining to chemical hazard, exposure and risk assessment, and risk communication. She has earned an international reputation in the legal and regulatory aspects of conventional and nanoscale chemical regulatory programs under the Toxic Substances Control Act (TSCA), the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the European Union's Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), and on issues pertinent to nanotechnology and other emerging transformative technologies. Specialties include chemical product approval and regulation under TSCA, FIFRA, and REACH, as well as nanoscale substances and nanomaterials law, policy, and regulation.

Today, Ms. Bergeson works with corporations and a wide range of trade associations on evolving regulatory and policy matters pertinent to products of conventional, biotechnology, biobased chemicals, nanotechnologies, and other emerging technologies particularly with respect to TSCA, FIFRA, Food Quality Protection Act (FQPA), REACH, and Occupational Safety and Health Administration (OSHA) matters. She is widely published, and lectures frequently on legal, regulatory, and policy issues affecting chemicals under federal, state, and international regulatory programs.

*Presentation abstract:*

Entities registering substances under REACH had to collect all existing available information on the intrinsic properties of a substance as well as on its manufacture, uses, and exposure. There could also be a need to generate data to fulfil endpoints not addressed with existing data. The availability of these data, compiled into dossiers, has applications and implications not only under REACH but also in other jurisdictions for other purposes. There also are entities other than those subject to REACH, including other companies and governmental agencies that may be seeking the data generated and compiled under REACH for REACH and/or non-REACH purposes.

Companies that are data owners or have been granted data citation rights must understand the ways in which data can be shared and disseminated, the potential legal and regulatory liabilities they face when data are disseminated beyond REACH, and any means by which such liabilities can be limited.
