

Global Chemical Disclosure Challenges & CBI

Jonathan Gerber, Advanced Regulatory Specialist
3M

Presenter biography

Jonathan Gerber is an Advanced Regulatory Specialist at 3M with over eighteen years of product stewardship experience. Mr. Gerber currently serves as 3M's subject matter expert on the Toxic Substances Control Act (TSCA) and is also involved in the company's product stewardship auditing program. Past responsibilities include hazard communication and product air quality regulations. Mr. Gerber has an M.S. in environmental health and a B.Ch.E from the University of Minnesota.

Presentation abstract

Hazard communication and chemical control regulations often try to strike a balance between protecting a company's confidential business information (CBI) and providing transparency to customers and public stakeholders. Efforts to achieve this balance have attracted intense interest in recent years and CBI requirements continue to evolve rapidly. This presentation will provide examples of key CBI requirements that businesses should consider in a global market.
