A Panel Presentation: Implementing HCS 2012 from the Perspective of Small Lubricant Manufacturers

Ann Ball, Product Health & Safety Manager, Regulatory Affairs
Milacron LLC, CIMCOOL Industrial Products LLC

Presenter biography

Ann Ball is the Product Health & Safety Manager, Regulatory Affairs for CIMCOOL Industrial Products LLC, a division of Milacron LLC in Cincinnati, Ohio. Employed by CIMCOOL since 1988, Ann has worked on projects or in positions in the areas of health, safety, environment, testing and compliance associated with metalworking fluids and related products. She has been in her current position since 2010 spending much time supporting the conversion of M/SDS & labeling for product manufactured in Korea, China and the US to their revised regulations that have integrated GHS elements for the respective country and region. Ann has a Bachelor of Science degree in Animal Science/Agricultural Business from The Ohio State University.

Presentation abstract

Information in this presentation is intended to provide insight on a few of the experiences a small lubricant manufacturer has had in the conversion and compliance journey associated with HCS 2012. A few examples will be provided to highlight some observations in the varied interpretations of the standard within the industry. The ultimate goal of the presentation is to initiate discussion with attendees, and determine if everyone in all industries are having similar experiences.
