Labeling for Consumer Products

Monday, April 23, 2018
Orlando, Florida

Course Description and Objectives

The goal of this course is to provide an understanding of U.S. Consumer Product Safety Commission (CPSC) labeling requirements. Emphasis will be placed on relevant Federal Hazardous Substances Act (FHSA) regulations that pertain to the risk-based labeling of consumer labels. The course will also provide time for working through selected examples of FHSA-compliant labeling and for participant discussion of consumer labeling issues. This course has been updated to address the co-existence FHSA-compliant labels with the new OSHA HazCom 2012 labels.

This is considered to be an advanced course. While there are no formal prerequisites for this course, it is strongly recommended that participants have a working knowledge of MSDS and labels and that they have either taken the SCHC courses *Toxicology for Hazard Communication* and *Hazard Determination and Risk Assessments* or that they are comfortable with the basic principles of toxicology, hazard determination, and risk assessment.

Intended Audience

Hazard communication professionals looking to improve their consumer product labeling skills.

Course Fee: \$275 / members \$365 / non-members

Course Director / Instructor

Robert Skoglund, Ph.D., DABT, CIH

Dr. Skoglund is the Director of Product Safety and Regulatory Affairs at Covestro LLC. His responsibilities include compliance, safety, and stewardship, including hazard communication.

Course Director / Instructor

Robert Roy, Ph.D., DABT

Dr. Roy is a Lead Toxicology Specialist at 3M in St. Paul, Minnesota. His primary responsibilities include assessing the human health hazards and safety of products and other materials for several 3M business units. In addition, he leads the development of the 3M Occupational Exposure Guidelines; and plays a leadership role for California Proposition 65 compliance, consumer product labels, and hazard determination, hazard communication, and human risk assessment issues.
