Advanced Topics in EHS: Role of Human Data  
in Hazard Communication

Monday, April 23, 2018

**Course Description and Objectives**

The Advanced Topics in EHS series of courses is designed to expand on topics that are introduced in the basic SCHC courses. The topic of human data is introduced in the SCHC course Hazard Determination and Risk Assessment.

The goal of this course is to provide an examination of the role of human data (experimental, observational, and anecdotal) in hazard communication. Emphasis is placed on an understanding of the technical skills and background necessary to analyze, interpret, and apply these data to hazard determinations and risk assessments. Additional topics will include the regulatory requirements for capturing, analyzing and acting upon allegations of unexpected adverse effects under TSCA 8(c), FIRFA 6(a)(2), and CPSA 15(b).

This is an advanced course. While there are no formal prerequisites for this course, it is strongly recommended that participants have a working knowledge of MSDS and labels and that they have either taken the SCHC courses *Toxicology for Hazard Communication* and *Hazard Determination and Risk Assessment* or that they are comfortable with the basic principles of toxicology, hazard determination, and risk assessment.

**Intended Audience**

Hazard communication professionals looking to strengthen their hazard determination and risk assessment skills.

**Course Fee:**                    \$275 / members                    \$365 / non-members

**Course Director / Instructor**

**Robert Skoglund, Ph.D., DABT, CIH**

Dr. Skoglund is the Director of Product Safety and Regulatory Affairs at Covestro LLC. His responsibilities include compliance, safety, and stewardship, including hazard communication.

**Course Instructor**

**Robert Roy, Ph.D., DABT**

Dr. Roy is a Lead Toxicology Specialist at 3M in St. Paul, Minnesota. His primary responsibilities include assessing the human health hazards and safety of products and other materials for several 3M business units. In addition, he leads the development of the 3M Occupational Exposure Guidelines; and plays a leadership role for California Proposition 65 compliance, consumer product labels, and hazard determination, hazard communication, and human risk assessment issues.

Advanced Topics in EHS: Role of Human Data  
in Hazard Communication

Monday, April 23, 2018

**Course Instructor**

**Ann C. Thompson, Ph.D.**

Dr. Thompson is a Technical Manager at the 3M Company. Her responsibilities include hazard communication, product stewardship support, training and managing the emergency hotline. She has provided regulatory toxicology support for a number of industrial, healthcare and consumer product divisions within 3M and has developed the business processes, training and teams that help meet 3M's Safety Data Sheet and labeling obligations for REACH, GHS and HazCom 2012.

**Course Topics and Schedule (Subject to Change)**

**Monday, April 23, 2018**

7:30 – 8:00	Registration
8:00 - 9:10	Overview of human data Experimental human data
9:10 - 9:25	Break
9:25 - 10:35	Observational human data (epidemiology)
10:35 - 10:50	Break
10:50 - 12:00	Case reports and anecdotal data Regulatory obligations for anecdotal data

**Registration**

Admission to the course will be on a first come basis. Payment must be received by March 10, 2018, to secure your space. Space is limited.

Fill out the registration form located on SCHC's website: <http://www.schc.org>

SCHC accepts checks, Visa, MasterCard and American Express.

**Cancellation Policy**

No refunds will be given after March 10, 2018. No one will be admitted to the course unless all fees have been paid in advance. Substitutions are permitted. Every effort has been made to ensure the information in this brochure is accurate. SCHC reserves the right to modify this course without prior notice or to cancel the course 30 days prior to the course date. In the event this course is canceled, SCHC's obligation is limited to a full refund of the course fee.
