Advanced Topics in EHS: Immunotoxicology (Sensitization)

Monday, March 18, 2019

Las Vegas, Nevada

Course Description

The *Advanced Topics in EHS* series of courses are designed to expand on topics that are introduced in the basic SCHC courses. The topic of immunotoxicology is introduced in the course *Toxicology for Hazard Communication*.

The goal of this course is to provide participants with an understanding of immunotoxicology (with a significant focus on hypersensitivity or sensitization). Emphasis is placed on an understanding of the basic science of this topic and an introduction to the technical skills and background necessary to develop, evaluate, and apply hazard determinations, hazard classifications, and risk assessments involving immunotoxic chemicals or mixtures.

This is an advanced course. While there are no formal prerequisites for this course, it is recommended that participants have a working knowledge of SDS and labels and that they have either taken the SCHC course, *Toxicology for Hazard Communication*, or that they be comfortable with the basic concepts of toxicology.

Intended Audience

Hazard communication professionals looking to expand their knowledge and expertise regarding target organ toxicity.

Course Fee: \$275.00 for members \$365.00 for non-members

Course Director / Instructor

Robert Skoglund, Ph.D., DABT, CIH

Dr. Skoglund is the Director of Product Safety and Regulatory Affairs at Covestro LLC. His responsibilities include safety, compliance, stewardship, and sustainability for North America.

Instructor

Catherine F. Jacobson, Ph.D., DABT

Dr. Jacobson is a Senior Toxicology Specialist at the 3M Company. Her primary responsibilities include assessing the human health hazards and risks of raw materials, chemical intermediates, and products for several 3M business units. In addition, she oversees the authoring of hazard communication documents and develops comprehensive health hazard profiles for chemical substances important to 3M.
