

Starting a Hazcom System or Fixing an Ailing One [A Panel Presentation]

Jennifer Amable
Pilot Chemical Company

Presenter biography

After finishing her Master's Degree in Risk Assessment at the University of Illinois, Jen Amable worked in consulting for 12 years before entering industry. During her consulting career she completed environmental and human health risk assessments, onsite health and safety, REACH registrations and TSCA PMN submissions. In 2013, Jen managed a client's transition to GHS which involved reauthoring over 4000 SDS to GHS – solidifying her career in Hazard Communication. Jen is currently working in Industry as a Product Safety and Regulatory Specialist for Pilot Chemical Company.

Presentation abstract

The panel discussion will begin with a 'How to Start a New Hazard Communication Program' presentation. The presentation will cover four main components of a strong Hazard Communication Program including, who should be involved, chemical inventory, training, SDS and labeling. In addition to an overview of each component, each will be discussed with compliance concerns and considerations. Finally, we will end the presentation with a review of laboratories in respect to HazCom.
