

EU Poison Center Notifications

**John Falk, President
opesus America**

Presenter biography

John is the President of opesus America, a software and consulting company that has been working with product notifications to EU poison centers since 2013; and is an active participant in the ECHA IT User Group, among other organizations. Over the past 14 years, John has worked across multiple product stewardship elements including establishing core EHS business processes, launching SDS authoring software, and managing DG data.

Presentation abstract

CLP Article 45 for EU Poison Center Notifications is one of the most talked about product compliance regulations since REACH. This presentation will cover:

- Regulatory requirements
- Tools available to submit notifications
- Guidelines and experiences from a variety of industries

With the first submission deadline of 2021, now is the time to take action to ensure regulatory compliance for your company!
